

Air Brake Pedal Cutaway

Overview

The air brake pedal cutaway is a bench top training system which is designed to illustrate the air brake pedal parts, and how it works. This cutaway is mounted on a small display frame for easy movement.

Specifications

- This cutaway is a subset of a larger braking system. The core focus of this cutaway is to demonstrate the air brake pedal.
- All the components are sectioned and showcased in different colors to allow the

trainee to observe the internal construction and components

- A sectioned air brake pedal is mounted on a small robust frame to ease the relocation.
- The cutaway demonstrates the working mechanism to assist the trainee into understanding the theory of operation.

Experiments

- Observation the internal structure of the air brake pedal.
- Familiarization with the operation principle of the air brake pedal.

Scope of Delivery

- Air brake pedal cutaway (BSB102)
- Hard copy user manual

Options

- Digital content (BI01)
